Mr. Marbury reported that both the projects were design-build request for bids format and six submittals had been narrowed down to one top firm. Once a contract was secured, it was hoped to have design submittals within a month and construction to begin in the fall. Electricity upgrades would be part of the project to satisfy the needs of annual events taking place at the park.

e) Presentation regarding the May 21, 2019 Special Election Ballot Question related to the road maintenance program and primary property tax. (Frank Marbury, Public Works Director/Town Engineer; Joe Duffy, Finance Director)

Mr. Marbury and Mr. Duffy presented an overview of the road maintenance/property tax ballot question:

- The top concerns of the community were drainage, trash and roads. The Roads Committee and the engineering department looked at the roads and determined a maintenance strategy.
- One third of the roads were arterial or main roads and two thirds were smaller, local roads. There were 153 total miles of Town road.
- Various pavement types included chip seal, asphalt, gravel and dirt, with 80 miles being chip sealed, 40 miles asphalt, and the remaining gravel or dirt.
- Pavement preservation techniques that were the cheapest required roads to be continually maintained. Arterial and corridor roads needed the most work and maintenance. The residential roads needed lighter maintenance.
- The cost over 20 years was approximately $32 million or $1.6 million per year. The current budget of only $400,000 for roads only covered three to five miles annually and would take 50 years to cover all the roads in Town.
- If the ballot measure were to pass, there would be a three-cycle seven-year schedule to cover maintenance of all the roads in Town. The Town would spend approximately $16,000 per mile which was approximately what the County spent per mile on their roads.
- The tax levy would cover $1.5 million annually and with the HURF funds, there would be $1.9 million available annually. The extra funding would be put away to be used on larger future projects. The funds would be strictly used for road maintenance and would not include employee labor, supplies, or overhead. Contractors would be hired to do the
work.
• The funds would be in a separate fund that would be audited annually with a report provided on how the funds were used within the specified guidelines. The tax would sunset after 20-years.

Mr. Duffy provided an overview of the average property tax increase for residents.
