- The windiest part of the year spanned November 1 to July 5, with an average low wind of 7.6 miles per hour. According to research, the windiest day was April 11th with an average low of 9.1 miles per hour or higher.

- No hot air balloons would be included because there were several balloon festivals in the area.
- The Town’s festival will officially be a Wind Festival. Staff and Board Members thought the Wind Festival was a good idea since the Town was called The Windy Valley.
- Features of the festivals would be windmills, kites, gliders and sails. It could include the history and new technology of windmills. There could be a display of historical windmills featuring the architecture of windmills.
- Include kite technology and how kites work including new and old technology. There could also be a kite making class and demonstration.
- Include a glider demonstration, possibly by Embry Riddle Aeronautical University (ERAU), who had provided gliding courses at Deer Valley Airport in the past.
- Include a paper airplane demonstration, workshops and races.
- Consider land sailing races and a sail gliding club demonstration.
- Vendors could include wind chimes, flags, and banners.
- Consider having food trucks.
- The Board agreed the festival was a unique and good idea.

- The Board needed to consider the budget and funding for the event.
- The location was discussed and staff suggested having the event out by Yavapai College.
- Staff would take the Board information to present to the Town and determine the support the festival received.
