**AGENDA ITEM TITLE:**
Presentation and discussion regarding the introduction of Town Street Maintenance and Cross Section Maps.

**SITUATION & ANALYSIS:**
Over the years, there has been some conflict about which streets the Town of Chino Valley maintains and which are not maintained. There are many streets in the Town that are not historically maintained. These usually fall into the category of a private street or easement. However, there are cases where the Town accepted right of way for a property to have legal access but did not require street improvements nor agree to maintain the street. In addition, there are historically maintained streets that have no or only partial amounts of right of way. The intention of the street maintenance map is to establish a baseline Town Street Map accepted by Council. This map would show the maintained streets within Town limits. After acceptance of the map, an unmaintained street would need to be accepted by Council to be added to the map. This would normally require improvements such as paving and drainage improvements.

The second map is one showing proposed cross sections for Town Streets. This would serve as a guide for the requirements of developers when improving streets within or adjacent to new subdivisions. It would also serve as a plan for capital street improvements as budget allows. In general, the primary streets between Roads 1 West and 1 East would have curbs and gutters with bike lanes. The higher traffic streets would remove the bike lanes in favor of detached multi-use paved pathways. The streets outside of the core area would be considered more rural, utilizing paved shoulders and roadside ditches rather than curbs and gutters. There is also a proposed network of unpaved trails for pedestrian, bicycle, and equestrian use.
